

Year 1 home learning – Maths

In year 1, we practise reading, writing and counting with numbers to 100. You can do lots of practise of this at home!

We also practise counting in 2s, 5s and 10s. Remember you can log on to TT Rockstars to practise this.

We have also sent you a MyMaths username and passwords to access more maths activities online. We will be uploading more activities for this week!

To practise your mental arithmetic, use the fluent in 5 sheet on the website each day.

Day 1

Use the Number bonds to 10, 15 and 20 sheet to match the addition number sentences to each number. You could spend some time practising quick recall of number bonds to 10 and 20 e.g. $4 + 6 = 10$, $14 + 6 = 20$. As a challenge, you could find number bonds to a different number within 20 e.g. $6 + 6 = 12$, $7 + 5 = 12$.

Day 2

Can you sequence the days of the week and the months of the year (please see the website for sheets if you wish to use them). Then, you can think about special events that happen in each month e.g. My birthday is in May. Bonfire Night is in November.

Day 3

Use the following website to practise setting the clock to o'clock times. You can then use the clock sheets to record things that you do at o'clock times.

<https://www.topmarks.co.uk/time/teaching-clock>

Day 4

Use the same website to practise setting the clock to half past times. You can then use the clock sheets to record things that you do at half past times. As a challenge, you could try quarter to and quarter past (this is a Year 2 learning objective but we do learn about quarters in fractions in Year 1).

Day 5

Can you use a stopwatch to time how long it takes to complete different activities e.g. 10 star jumps, walking up and down the stairs etc. You could use the sheet on the website to record the times. Think about minutes and seconds.
