

DAY 2

1. Reading

Read the Sunflower life cycle explanation saved below (Day 2 – Life cycle of a Sunflower reading comprehension), with the help of an adult if you need. With your adult, discuss any new words that you are unsure of. You could write these down and then use a dictionary or the internet to find out what they mean.

Please note, there are 3 different versions of the explanation text. Please choose the version which matches your child's reading ability best.

2. Comprehension

Use the explanation text to help answer the comprehension questions on the document. Remember to be a word detective! It is not enough to answer the questions, you need to show to your adult where you found the evidence in the explanation text. This could be a specific word or a picture in the explanation text. This will help you to develop your reading comprehension skills.
